**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/706,676	<b>Applicant(s)</b> ZOHAR ET AL.	
	<b>Examiner</b> Michael B. McFadden	<b>Art Unit</b> 2188	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 21 June 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-26 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-26 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 12 November 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### Status of Claims

1. Claims 1-26 are pending in the Application.

### Response to Amendment

2. Applicant's arguments filed on 21 June 2007 have been fully considered but they are not persuasive.

### Objections to the Claims

3. Claims 23-26 are objected to because of the following informalities:
4. **Regarding Claims 23-26**, all four of the claims are directed to "physical media which comprise each of the plurality of data storage logical units (LUs)". However, according to claims <sup>and 10</sup> 1, the data storage logical units (LUs) comprise physical media. The Office believes this is a typographic mistake and that the storage logical units are intended to comprise the physical media. If this were not the case then a possible 112 rejection would arise. For the purposes of further examination the Office will interpret the storage logical units comprising the physical media.
5. Appropriate correction is required.

sc  
9-14-07

**Claim Rejections - 35 USC § 103**

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sharma et al. ((US Patent No. 6,055,605) herein after Sharma).

8. **Regarding Claims 1, 2, 3, 10, 11 and 12**, Sharma discloses a storage system, comprising: a data storage logical unit (LUs) (**Sharma: Figure 3, Element 150**) comprising respective physical media, the one or more LUs being adapted to receive commands and responsive to the commands to store and recall data; and a plurality of ports, each port being adapted to maintain a plurality of LU command queues (**Sharma: Figure 3, Elements 312/322, 314/324, 316/326, and 318/328**) each of the plurality of LU command queues corresponding to the LUs, such that upon receiving a command directed to one of the LUs, the port places the received command in the respective LU command queue, converts the received command to one or more converted commands at least some of which are directed to the physical media of the one of the LUs, and conveys the at least some converted commands to the physical media in an order determined by the respective LU command queue. (**Sharma: Column 8, Lines 16-20.**) **Sharma must inherently convert the commands in some fashion. Commands stored in a command queue must be converted at the very least at the control**

**line. The opcode will be converted into bits that will be used to perform the requested command.**

9. Sharma fails to disclose a plurality of data storage logical units and each port having multiple command queues corresponding to a respective one of the LUs.

**However, Sharma shows a logical unit with each port having a command queue that corresponds to that logical unit. Duplicating the logical unit would require duplication of the command queue for the duplicated logical unit providing mere duplication of the logical unit and command queue parts of Sharma. Therefore, a plurality of data storage logical units and each port having multiple command queues corresponding to a respective one of the LUs is a mere duplication of parts and holds no patentable significance. *In re Harza*, 274 F.2d 669, 124 USPQ 378 (CCPA 1960).**

10. **Regarding Claims 5 and 14**, Sharma discloses the storage system according to claim 1, wherein each of the ports comprises a respective central processing unit (CPU) which operates each of the ports substantially independently. **(Sharma: Figure 3, Elements 202, 204, 206, and 208. and Column 8, Lines 12-16.)**

11. **Regarding Claims 6 and 15**, Sharma discloses the storage system according to claim 1, wherein the command is comprised in one of one or more strings of commands, each command of each string being directed via one of the ports to a respective one of the LUs **(Sharma: Column 8, Lines 16-20)**, and comprising a coupling **(Sharma: Figure 3, Element 300)** which: receives the commands comprised in the one or more strings, sorts the commands according to the ports via which the

commands are directed, and conveys the commands to the ports to which the commands are directed. **(Sharma: Column 8, Lines 12-28.)**

12. **Regarding Claims 7, 8, 16 and 17**, Sharma discloses the storage system according to claim 1, wherein the received command comprises a write command to store a data string from a host to the physical media, wherein the one or more converted commands comprise instructions to the host to convey the data string to the physical media via the port, and wherein the port is adapted to convey the instructions to the host and wherein the received command comprises a read command from a host to read a data string from the physical media, and wherein the one or more converted commands comprise instructions to convey the data string via the port to the host.

**(Sharma: Column 8, Lines 12-28.)**

13. **Regarding Claims 9 and 18**, Sharma discloses the storage system according to claim 1, wherein the physical media comprise the data, and wherein the port is adapted to track changes of location of the data within the physical media. **(Figure 3, Element 180. In order to maintain coherency the system must also be keeping track of where the data is located.)**

14. **Regarding Claim 19**, Sharma discloses wherein each port uses at least one table to convert logical data in the received command to data suitable for the respective physical media to which the command is directed. **In converting opcode instructions to the proper control line output a conversion table is used.**

15. **Regarding Claim 20**, Sharma discloses wherein each port uses one or more functions to convert logical data in the received command to the data suitable for the

respective physical media. **In order to convert the opcode instructions logic functions must be present in the circuitry.**

16. **Regarding Claims 4 and 13**, Sharma fails to disclose the storage system according to claim 1, wherein the command comprises a request according to a small computer system interface (SCSI) protocol, and wherein the storage system is operative according to the SCSI protocol. **However, the Office takes Official Notice that it would have been obvious for one of ordinary skill in the art. The motivation for doing so would have been that the technology is well known in the art and therefore be efficient and time saving to implement.**

17. **Regarding Claims 21 and 22**, Sharma discloses wherein at least one of the converted commands directed to the physical media is first sent to a fast access time memory acting as buffer, said fast access time memory being adapted to redirect the converted command to the respective physical media. **However, the Office takes Official Notice that it would have been obvious for one of ordinary skill in the art. The motivation for doing so would have been that the technology is well known in the art and therefore be efficient and time saving to implement.**

18. **Regarding Claims 23 and 24**, Sharma discloses wherein the physical media which comprise the plurality of data storage logical units (LUs) are slow access time non-volatile physical media. **However, the Office takes Official Notice that it would have been obvious for one of ordinary skill in the art. The motivation for doing so would have been that the technology is well known in the art and therefore be efficient and time saving to implement.**

19. **Regarding Claims 25 and 26**, Sharma discloses wherein a particular physical media which comprise each of the plurality of data storage logical units (LUs) changes over time. **However, the Office takes Official Notice that it would have been obvious for one of ordinary skill in the art. The motivation for doing so would have been that the technology is well known in the art and therefore be efficient and time saving to implement.**

**Response to Arguments**

20. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

21. Claims 2, 3, 5-9, 19 and 20 are argued to be allowable based on the argument that claim 1 is allowable. However, claim 1 remains rejected; therefore the associated claims remain rejected under the rationale provided above.

22. Claims 11, 12, and 14-18 are argued to be allowable based on the argument that claim 10 is allowable. However, claim 10 remains rejected; therefore the associated claims remain rejected under the rationale provided above.

23. **Regarding Claims 4, 13, 21 and 22**, the Applicant has failed to adequately traverse the Office's assertion of Official Notice. To adequately traverse such a finding, an applicant must specifically point out the supposed errors in the examiner's action, which would include stating why the noticed fact is not considered to be common knowledge or well-known in the art. Therefore, the well-known in the art statement is taken to be admitted prior art.

24. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

#### **Conclusion**

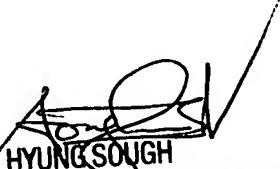

25. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael B. McFadden whose telephone number is (571)272-8013. The examiner can normally be reached on Monday-Friday 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sam Sough can be reached on (571)272-6799. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2188

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
